Professional Summary

DevOps Engineer with 3+ years of experience building and maintaining containerized infrastructure, automating deployment pipelines, and administering relational databases in production environments. Skilled in Docker, Ansible, and Jenkins for streamlining CI/CD workflows, with additional background in Agile project tooling as a Jira Administrator. Effective communicator with cross-cultural, international team experience.

Professional Experience

Ariana Tehran, Iran 2023 – Present
DevOps Engineer

- Orchestrated containerized microservices environments using Docker, improving deployment consistency and ensuring high availability and horizontal scalability across production systems.
- Automated server provisioning, configuration management, and application deployment across multiple environments by developing and maintaining Ansible playbooks, reducing manual setup effort.
- Built, maintained, and optimized CI/CD pipelines in Jenkins, accelerating software delivery cycles and reducing release friction between development and operations teams.
- Administered and tuned MySQL and PostgreSQL databases, optimizing query performance and safeguarding data integrity for business-critical applications.
- Configured and maintained NGINX and VMware ESXi infrastructure to support reliable, scalable service delivery.

Foreign IT Company East Asia 2023 (2 Months)
IT Consultant (Project-Based)

- Partnered with international engineering teams in a cross-cultural, remote-collaboration setting to streamline IT infrastructure and align operational practices.
- Supported the migration of legacy services to modern, automated Linux-based environments, improving maintainability and reducing operational overhead.

Ariana Tehran, Iran 2021 – 2023
Jira Administrator

- Administered enterprise Jira instances for Agile teams, customizing workflows, permission schemes, and dashboards to fit evolving team structures.
- Bridged development and operations functions by optimizing project tracking, reporting tools, and issue workflows, improving cross-team visibility and delivery predictability.

Technical Skills

Containerization & Automation:	Docker, Ansible, Jenkins (CI/CD), Git
Systems & Infrastructure:	Linux Administration, NGINX, VMware ESXi
Databases:	MySQL, PostgreSQL
Project & Agile Tooling:	Jira Administration, Agile/Scrum
Languages:	English (Fluent), Persian (Native)

Key Projects

- **Containerized Microservices Platform** – Designed and operated a Docker-based deployment workflow at Ariana, standardizing environment configuration and enabling reliable horizontal scaling of services.
- **Infrastructure-as-Code Automation** – Authored reusable Ansible playbooks to automate server provisioning and configuration across development, staging, and production environments.

Education

Islamic Azad University, North Tehran Branch Tehran, Iran
B.S. in Information Technology Graduated

Certifications

- CompTIA Network+
- Cisco Certified Network Associate (CCNA)
- TTC – English Teacher Training Certificate

Achievements & Strengths

- **Communication:** Two years of English teaching experience translate into clear, precise technical documentation and cross-team communication.
- **Adaptability:** Demonstrated ability to work effectively in international, cross-cultural environments, including a project-based consulting engagement in East Asia.
